

## FFP RF 1: Agricultural Productivity Results Framework

### Foundational Results:

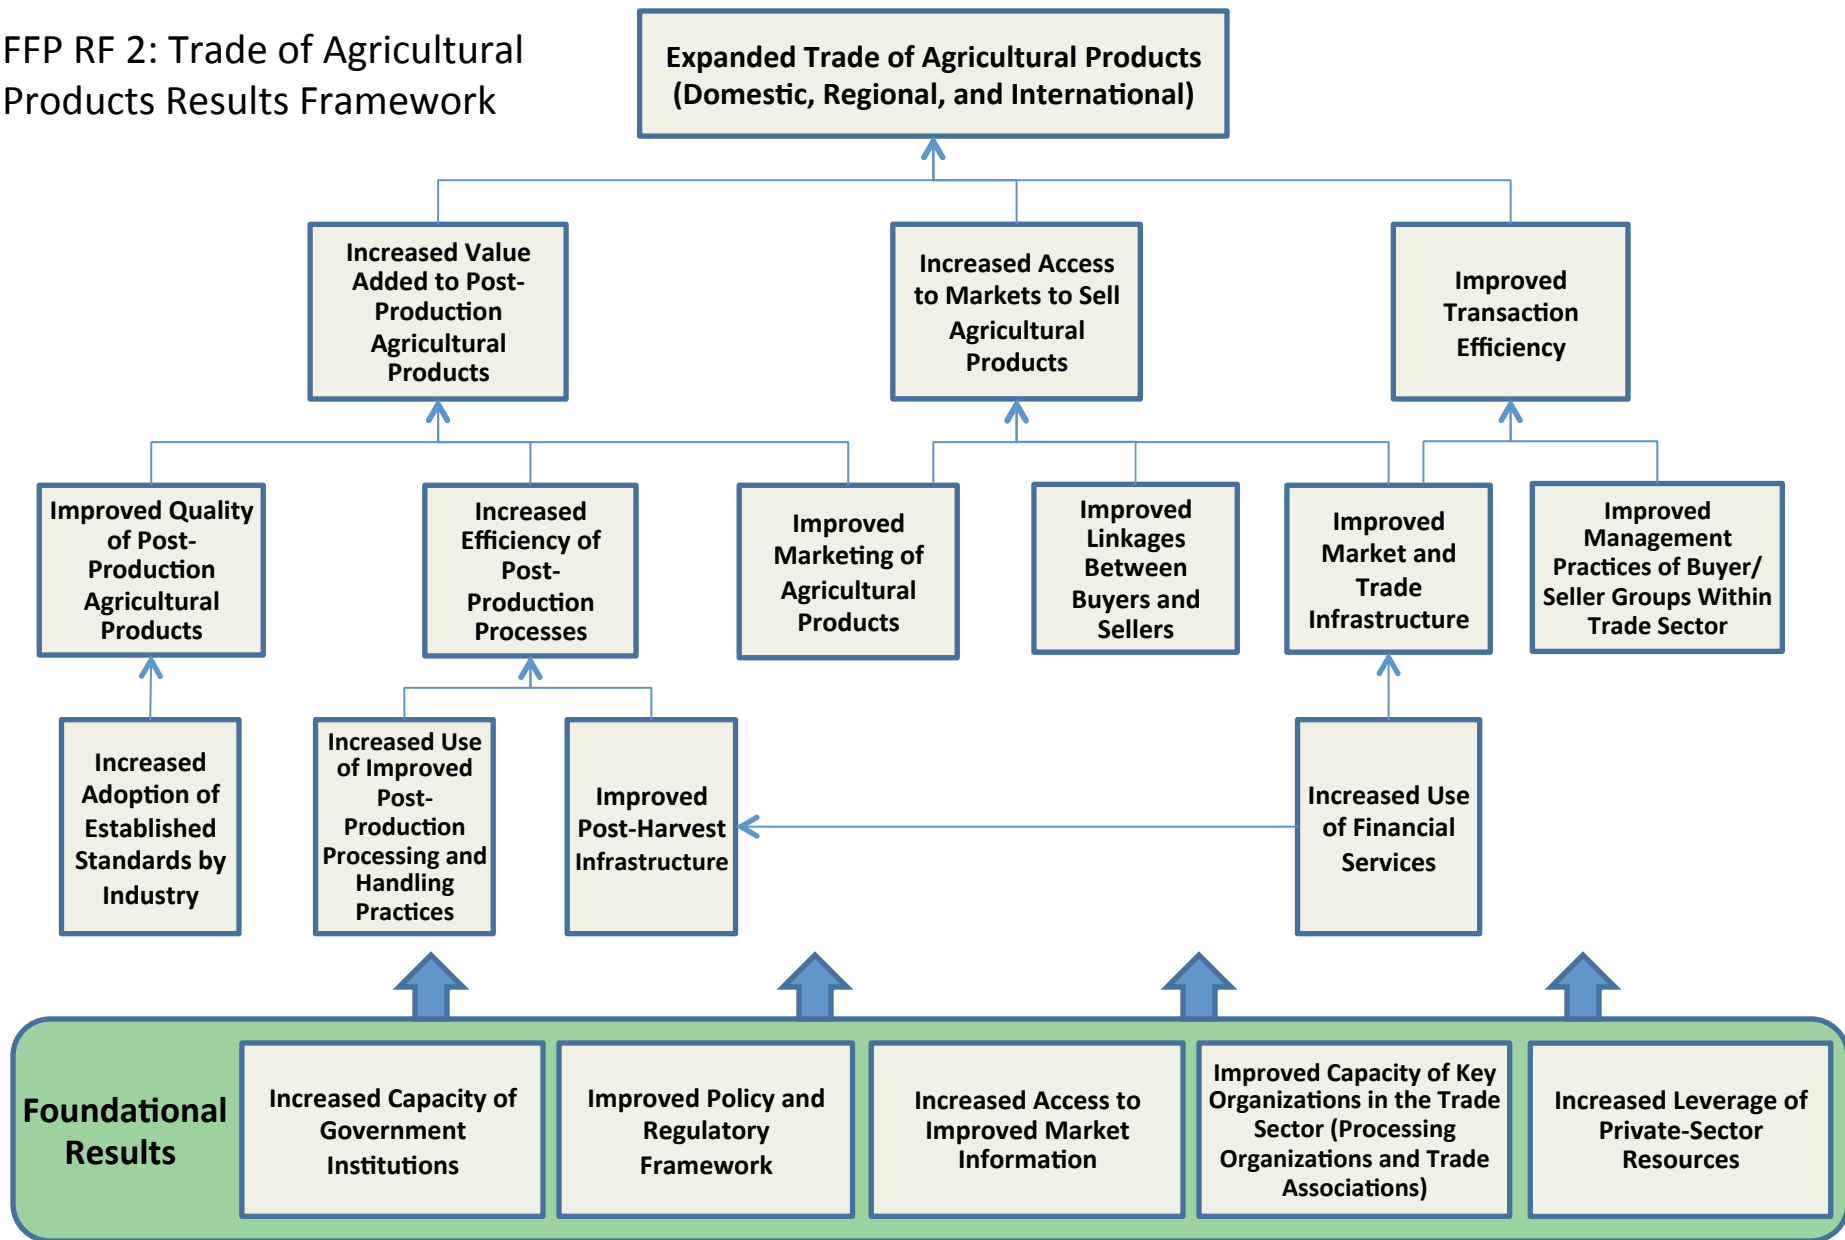

- Feed into one or more higher-level results
- Target critical actors or areas that increase the potential for lasting impacts
- Causal relationships exist between some foundational results

# **FFP RF 1: Agricultural Productivity Results Framework Illustrative Critical Assumptions**

---

- Land tenure issues are not a constraint to farmers investing in their land
- Global economic factors (e.g., currency, commodity prices, or input costs) remain relatively stable
- No major climate or natural disasters occur
- There is a positive level of government commitment (i.e., political will, climate, and security)

## FFP RF 2: Trade of Agricultural Products Results Framework

### Foundational Results:

- Feed into one or more higher-level results
- Target critical actors or areas that increase the potential for lasting impacts
- Causal relationships exist between some foundational results

## **FFP RF 2: Trade of Agricultural Products Results Framework Illustrative Critical Assumptions**

---

- Consumer demand for targeted products is established
- Global economic factors (e.g., currency, commodity prices, input costs) are relatively stable
- There is a sufficient level of government capacity and commitment towards trade
